## GENERAL INDEX TO VOLUME LXIII

**January 1 to June 30,, 1926**

EXPLANATORY NOTE

Illustrated articles are marked with an asterisk (*), book notices with a dagger (†), inquires with a double dagger (‡). The cross-references condense the material and assist the reader, but are not to be regarded as complete or inclusive. So, if there were a reference from "Boiler" to "Stoker," and if the searcher failed to find the required article under the latter word, he should look through the "boiler" entries, or others that the topic might suggest, as he would have done had there been no cross-reference. Letters are indexed under title or subjects, general articles under writer's name as well. Not all articles relating to a given topic necessarily appear under the same entries.
